Tel.+49 6151 16-70922, Fax. +49 6151 16-70921
<http://seemoo.de> or <http://www.seemoo.tu-darmstadt.de>

The exam is scheduled for
March 16 (Tue) & March 17 (Wed), 2010

- Registration
 - Please mind the **official registration deadline** (not for all students)!
 - The students participating in the exercise are eligible for a an **enhanced** exam covering the exercise material. The special exam can be “booked” using the appropriate “Prüfungsnummer” (your exam office should know, in case of doubts drop me an email).
 - **All students please register** with delphine.christin@seemoo.tu-darmstadt.de until **January 30, 2010**.
 - Include your field of study (CS, ETIT, WiET, ...), and your Prüfungsordnung
 - Include your preferred exam language (english, german)
 - Include if you take the exam with/without exercise material
- Consultation hours will be announced on the webpage

How Does the Exam **Really** Look Like?

- The exam covers the entire **lectured** material
 - You should have a thorough understanding of the lectured material and esp. be able to explain the workings of the discussed algorithms/protocols
 - In addition you are expected to **review at least one standard and one research paper** from the website (core idea needs to be clear)
 - Appendices of the lecture slide are **bonus** material
- The exam is „closed book“
- The exam is oral
 - You will be given problems/questions to work on
 - You will be given questions to be answered directly
 - You can draw figures to explain the solution
- I very much recommend to form teams during the preparation and consult a textbook to properly understand the key aspects of the lecture
